

"Hello Everyone!"

Operators

+ Quizes

## ① Arithmetic Operators

[ +, -, /, \*, //, \*\*, % ]

① // → floored Division Operator

$\text{floor}(x)$

↳ Greatest int

Smaller than  $x$

eg:

$\text{floor}(2.3)$

3

$$\text{floor}(5.9) \rightarrow \underline{\underline{5}}$$

$$\text{floor}(0.7) \rightarrow 0$$

$$10 // 3$$

$$10/3 \xrightarrow{\text{floor}} (3, 3, 3) \rightarrow \underline{\underline{3}}$$

$$-3$$

$$\text{floor}(-3.\underline{2})$$

$$-10 // 3$$

$$\text{floor}(-3.\underline{33}) \rightarrow \underline{-4}$$

④  $** \rightarrow$  power

$$x ** y \rightarrow x^y$$

$$4 ** 2 \rightarrow$$

$$25^{(0.5)} \rightarrow 25^{1/2} \rightarrow \underline{\underline{5}}$$

⑤  $\% \rightarrow$  Modulus  
 $\hookrightarrow$  (Remainder)

$x \% y \rightarrow$  remainder  
obtained  
by  $x/y$

$$10 \% 2 \rightarrow 0$$

---

$$10 \% 3 \rightarrow \underline{1}$$

$$5 \% 3 \rightarrow 2$$

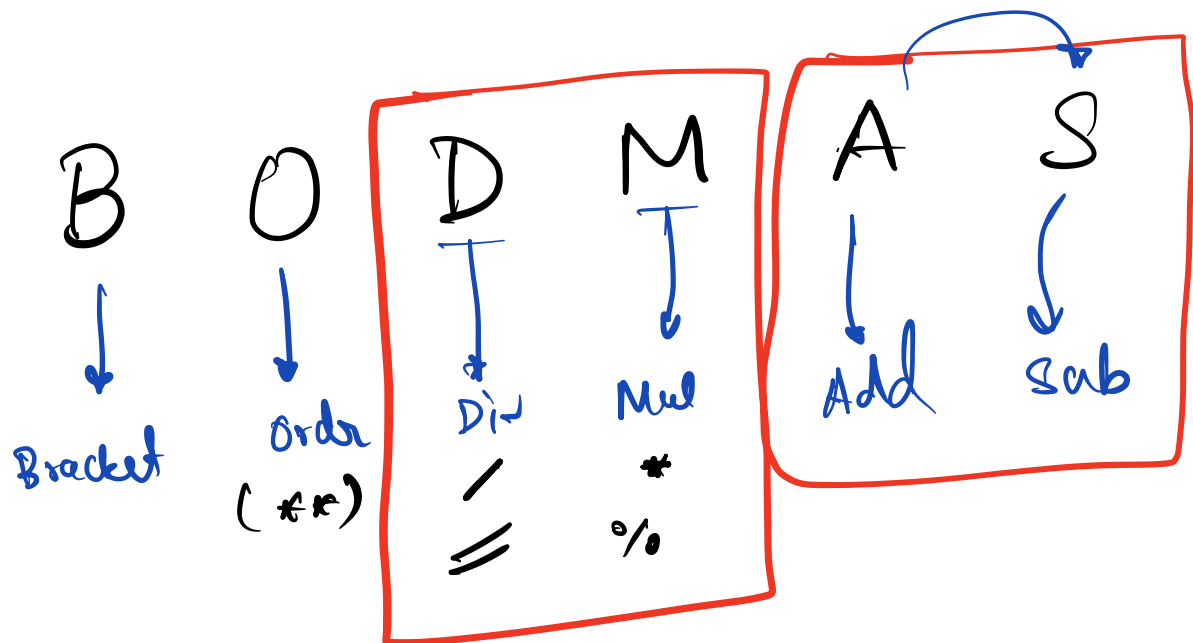

Extra :-

$$-10\% \cdot 3 \longrightarrow ? \quad \underline{\underline{(hw)}}$$

## \* Precedence of Operators

Rule :- equal precedence  
 left → right

$$10 \quad \text{---} \quad 2 + 3$$

$$10 + 1$$

---

11

Ans :-

Python  $\rightarrow (10 - 4 * 2 + 5 - \underline{6/2})$

~~4~~

✓ 4.0

$$10 - 8 + 5 - 6/2$$

$$10 - 8 + 5 - 3.0$$

$$2 + 5 - 3.0$$

$$7 - 3.0$$

$$\rightarrow \underline{\underline{4.0}}$$

---

$$\underline{3} \% \underline{5} \rightarrow \underline{\underline{(3)}}$$

10:12

②

Comparator / Relationship Operators

( > , < , >= , <= , == , != )

bool  
T/F

!

equal ?

not equal

! (True) → False

### ③ Assignment Operators

$\equiv \rightarrow$  standard assignment operator.

①  $a = 4$

$a = a + 4$  ①

$= 4 + 4$

$a = 8$  ②

print(a) → 8

Note:- Assignment always happens at the end.

## \* Special Assignment Operators

$a = 3$

$a += 4$

$a = a + 4$

h.w ++ → ?

$$\underline{a - = 3}$$

$$a = a - 3$$

$$a = -3 \times$$

$$a = 9$$

$$a / = 3$$

$$a = a / 3$$

$$= 9 / 3$$

$$a = 3.0$$
